

# Value for VET centres and other educational and training providers

## Why should your organization collaborate with the BuildSkills Academy?

By engaging with the CoVE Buildskills Academy, **VET centres and other educational and training providers** will gain access to transformative opportunities that position it at the forefront of the European VET excellence and the construction sector's twin transition.

By adopting BuildSkills Academy results, VET centres and other educational and training providers enhance their training offer, strengthen their institutional profile, and directly contribute to skills development for the twin transition and sustainable construction. They could benefit from visibility, innovative tools, enriched courses, and stronger networks while making a measurable impact on learners and the wider vocational ecosystem.

## Access to innovative tools and methodologies and enhanced training excellence, improving EQAVET alignment and access to comprehensive skills matrix

- Implement the BuildEnrichedSkills Methodology (BESM) upgrading the training quality of your courses to meet industry demands, and to become fully compliant with European Quality Assurance standards.
- Receive tailored recommendations to modernise and enrich courses and strengthen alignment between training content and labour market needs.
- Access a detailed Green and Digital skills framework, based on industry feedback and emerging needs.
- Enrich at least one course and expand your training portfolio with future-proof skills content.
- Connect your organization's training offerings and BSA's transnational certification standards through the BSA Certification Framework and have your course certified by an accredited certification body.

# Value for VET centres and other educational and training providers

## BSA Trainings list:

1. Work Safety in Construction (EQF 3)
2. Building Information Modelling. Digital Tools in Construction. (EQF 4)
3. Circular Waste Management (EQF 4)
4. Construction Technology (EQF 4)
5. Energy Efficient Installation in Buildings (EQF 4)
6. Energy Management for Buildings (EQF 4)
7. Resilient Buildings and Cities. Build Liveable Urban Environment. (EQF 5)
8. Smart, Resilient & Circular Cities (EQF 5)
9. Bio-inspired Innovation and Design for Sustainable Engineering Solutions (EQF 6)
10. Circular Economy and Waste Management (EQF 6)
11. Risk and Reliability in Health and Safety (EQF 6)
12. Digitalization and Sustainable Development: Artificial Intelligence (AI) and Machine Learning (ML) Tools for Sustainability (EQF 7)

## Take advantage of the BSA Courses Portfolio

- Access a comprehensive BSA training offer (see “BSA trainings” list below), which can be adapted to your local context.
- Add certified courses on EQF 3-7 to your training portfolio.
- Increase the attractiveness of your training programmes for students and companies through certifying successful trainees.

## Direct Impact on Learners

- Deliver enriched courses to learners and professionals.
- Equip participants with skills linked to the twin transition (green and digital).
- Improve employability and career opportunities for learners.

## Enhanced Institutional Visibility, Networking and Collaboration

- Participate in BSA network communication and promotional activities, by way of example and without limitation, allowing your organisation’s logo to be displayed on BSA’s [website](#) (securing exceptional visibility at transnational level, reaching key stakeholders, industry leaders and decision makers worldwide).
- Demonstrate your organisation’s commitment to sector advancement and innovation, representing its voice in BSA network discussions and outcomes validation.
- Enhance your organization’s reputation as an innovative, future-oriented and forward-thinking leader in sustainable construction practices.
- Connect with CoVEs, professional chambers, clusters, associations, companies, other VET providers and high-level ecosystem players across Europe.
- Participate in joint events and peer learning activities.
- Share and adopt best practices to strengthen institutional performance.

## Strategic Contribution and Recognition

- Provide feedback and data that influence the refinement and exploitation of BuildSkills Academy results.
- Strengthen your institution’s position as a key actor in European vocational excellence.
- Demonstrate commitment to reskilling, upskilling, and sustainable development goals.
